

Loman Art

Upcycling products by Loman Pawlitschek

upcycling, recycling converting metals
mobiles, forms the use of petals.
some use wood, paper plastic
the outcome absolutely fantastic!
care for the environment
you can enjoy retirement.

upcycling

other people can throw and waste
be creative and enjoy the taste.
world rejoice we have productivity
this is great cause for conductivity.
if ugly and useless don't waste time
convert it to something useful and fine
think quality everlasting
it will be better than fasting!

the synchronicity of the mind

solitude, is happiness and the
formation of creation,
solitude, is reflection and the
conception of creation,
solitude, is inovative
care to be creative?

a waterfall of color
leaves and circles oh brother!
green and orange metal clinking
orange and bright forms clanking
so calming its breathtaking
threads of forms scintillating
the breeze stirs and you hear
leaves tinkling in the ear
principles and elements of design
send shivers up your spine
and you smile to see such unity
so appropriate in the community.

leaves tinkling

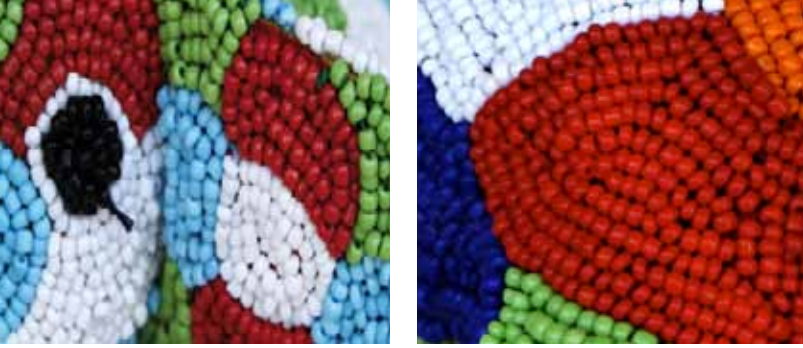

we are many artists,
and we are many lost.
we are so talented
it is easy to get lost.
open your eyes and see the sky -
it is so high we can fly
or
die.

we are many artists

we are many artists
and we are many lost.
we are so talented
baring our souls at what cost?

friendship is empowering
its flowering,

seeds of friendship

desire for love and acceptance
is a need,
a human creed.

plant a relationship and watch it grow
truth and honesty
the key to sow.

elevate yourself up to the sky
rise high and you will fly

the road is long when your gone
so come fly with me and you will see

take flight

let the wind accelerate your flight
and i will keep you in my sight

glide through the atmosphere
feel your wings in the stratosphere

just close your eyes and feel the mystery
although it could be blistry

love in this moment of time is fine,

love in many things,
like you me and the
family tree,

you are joined to me in friendship with love
&
it fits like a glove.

love in this moment of time

this moment in time is for us
thus
the future you will never know so, let it
grow.

love in this moment of time.

use your brain to achieve
life is for you don't grieve.
don't measure life in drips and drabs
fly to the goal and make a grab!

thinking comes from the soul -
achieve and keep in control
you never know the reward
go forth and avoid discord.

we call it "divine inspiration"
think of god and you have creation
a tapestry of life living
is a melody of life giving

think of me at 43 -
be free and you will see!

Inspiration

creativity lurking and full bursting,
reflecting and thinking at 43,
new ideas and forever thirsting,
being self taught and free!

mobiles songs and poetry,
up-liftment is the key,
to help many i decree,
in one year you see!

experimenting with up-cycling'
another way of educating.
we are now re-cycling,
inventing and so exciting!

formost the mobiles are
it was a great start,
turned into a form of art
where music and poetry won't part.

a steady business going,
many ideas i have flowing,
all the years they were sowing,
i did not know i was growing.

my love to inspire,
to help i aspire,
all else is desire,
the fire burns to never tire!
